Web browser Tracking Platform

Color Code:

Green: vehicle is in motion

Red: vehicle stopped *

Black: No data received from the device. **

* If the GPS signal of your device is blocked, it may show as red and in wrong location.

** When the device is unplugged or in a place without cellular signals, it appears to be black on the map.

Subscription Panel

1. Reactivate a device

2. The reporting frequency of GV500M cannot be changed. It's always reporting every 10 seconds

3. Schedule a cancelation

4. Add a new device

5. Switch between "Brief" and "Advanced" version web tracking platform

The default programming for the GV500M device is to update every 10 seconds in motion and once per hour in stationary.

The device must be plugged into the OBD-II port of the vehicle in order to function

Important Facts

When powered ON, the Green CEL LED blinks every 3 seconds, indicating normal connection to the server.

The Blue GPS LED blinks when searching for GPS signals, and becomes stable when signals are found.
